\* How do you define knowledge and wisdom? Is wisdom related to our education system? How?

→ Knowledge is information of which someone is aware, knowledge is used to mean the confident understanding of a subject, potentially with the ability to use it for a specific purpose.

Wisdom is the ability to make correct judgments and decisions. It is an intangible quality gained through our experiences in life.

Wisdom is what makes our minds open and unbiased. Our thoughts and feelings grow less personal as we gain wisdom. It enables us to put our knowledge to good use for humanity. We love our enemies. When we have wisdom, we have no ego, and we don't have any prejudices. Wisdom is an element of human life that complements education/knowledge. Developing wisdom in students has to be one of the educational goals, and it has to be taught in schools. With practical examples, it must be planted and nurtured in one's mind.
